Oswald literature-distribution- Wasp - CE 1370, s.b (Ex 1412)

The comment by J. Edgar Hoover at the top of page 2 of CD 1370, that the copies of the handbill were "ordered/ from the Jones Printing Company... by Lee Harvey Oswald is false, opposed to what the FBI reports themselves say, and personally involve the director in this deception of the Commission.

One added note: it seems inconceivable that none of the extensive security forces I presume are on such an expensive and enormous naval property like a modern aircraft carrier took no interest in this occurence, that they took no pictures, that none of the crew took pictures if only out of curiosity, and that there seems to have been no search at all for any pictures.
